

## **Summary**

As part of my training at Simplon Grenoble from January 8, 2024, to November 23, 2024, and in order to obtain the diploma of Web and Mobile Developer, RNCP title 37674 at level 5, equivalent to a two-year degree, I was required to create a website along with a project dossier.

In this context, I developed the project around the JDRCnexion site.

This is a website in the world of Role-Playing Games, aimed at helping players find their next adventure partners through a sorting system based on the availability provided by these players. Additional options will accompany this feature, such as searching for a Game Master or looking for players for a specific game, etc. Furthermore, a section of the site will be dedicated to presenting, through articles, various aspects of Role-Playing Games and their universe.

This project was carried out independently, from the inception of the idea to its launch, allowing me to develop all the necessary skills for a career as a web developer.
